

Chameleon RF upgrade to the Agere 802.11b Gold Radio-What's Included?

Suggested Price: \$720*

Every Chameleon RF/Agere Gold Radio upgrade for the PDT68XX, WSS10XX, and VRC69XX series terminals include the following:

- 1) A complete diagnostic check** of the terminals submitted for upgrade
- 2) Radio firmware upgrades
- 3) Mounting bracket alterations
- 4) Radio
- 5) Radio integration
- 6) Antenna
- 7) Antenna integration
- 8) LWP (TCP/IP stack) installation
- 9) Terminal cleaning
- 10) Re-packaging

Benefits of upgrading the above terminals to the Agere Gold Radio:

- 1) Your customers want one radio solution. You can give them what they've been asking for, a COMPLETE Agere network.
- 2) Enhanced WLAN Security (WEP Plus)
- 3) Improved power savings/battery life
- 4) Interoperability. Agere has proven to have had optimal interoperability with other 802.11b infrastructures
- 5) Outstanding Software Support

*Terminal upgrade list price is based on fully functional/undamaged terminals. Additional charges may be incurred based on needed repairs. Full estimates will be given at the point of initial inspection. Customers will be contacted before any repair work is started.

**Diagnostic checks will cover the following hardware portions of the devices: scan engine, housing, trigger, cable, keyboard, overlay, cpu, display, radio connector/antenna, upper shell, lower shell, battery, etc... Any terminals that are found to be damaged or inoperable will be brought to the attention of the reseller immediately
