

## Chameleon RF upgrade to the Cisco 350 Series Radio-What's Included?

Suggested Price: \$720\*

Every Chameleon RF/Cisco 350 Series upgrade for the PDT68XX, WSS10XX, and VRC69XX series terminals include the following:

- 1) A complete diagnostic check\*\* of the terminals submitted for upgrade
- 2) Radio firmware upgrades
- 3) Mounting bracket alterations
- 4) Radio
- 5) Radio integration
- 6) Antenna
- 7) Antenna integration
- 8) LWP (TCP/IP stack) installation
- 9) Terminal cleaning
- 10) Re-packaging

Benefits of upgrading the above terminals to the Cisco 350 Series Radio:

- 1) Your customers want one radio solution. You can give them what they've been asking for, a COMPLETE Cisco network.
- 2) Enhanced WLAN Security (WEP, LEAP, TKIP)
- 3) Improved power savings/battery life
- 4) Firmware upgrades without radio removal
- 5) Support with up to 3 ESSIDs
- 6) Adjustable radio output: up to 100mW

\*Terminal upgrade list price is based on fully functional/undamaged terminals. Additional charges may be incurred based on needed repairs. Full estimates will be given at the point of initial inspection. Customers will be contacted before any repair work is started.

\*\*Diagnostic checks will cover the following hardware portions of the devices: scan engine, housing, trigger, cable, keyboard, overlay, cpu, display, radio connector/antenna, upper shell, lower shell, battery, etc... Any terminals that are found to be damaged or inoperable will be brought to the attention of the reseller immediately
